

### Primary endpoint (day 61)

- Death within 60 days

### Secondary endpoints (day 15, 29, 91)

- Disease progression on WHO scale within 28 days
- Time to sustained recovery
- Time to first hospital discharge
- Modified WHO score at day 15 and 29
- Serious adverse events leading to study treatment discontinuation or death
- Viral clearance (SARS CoV2 PCR)
- Systemic inflammation during hospitalisation

Review vital signs, oxygen therapy, WHO stage  
Review concomitant medication and adverse events  
Safety lab, **biobanking** (serum, EDTA plasma, viral sample)

End of study evaluation (phone)
